

STEP INTO MUSIC WITHOUT LIMITS

Autonomic specializes in smart and flexible multi-room audio solutions with its award-winning lineup of digital media servers and networked matrix amplifiers. Our vast range of music streaming products are engineered for custom whole-home and commercial audio installations as standalone music systems or integrated with popular third-party automation systems.

AWARD-WINNING MUSIC SERVERS

The award-winning Mirage Media Server (MMS) product line offers state-of-the-art, high resolution audio with the convenience of accessing all local audio content and streaming music services within a single device.

- Robust native Streaming Support
- Reliable Control System Integration
- Local Library & NAS Support
- High-Res 24-bit/192kHz Digital Output

FLEXIBLE MATRIX NETWORKED AMPLIFIERS

The Mirage Amplifiers are cutting-edge, IP controllable matrix multi-room amplifiers with some of the highest performance specifications in its class. Boasting up to 50 watts per channel into an 8-ohm load, our amplifiers have the power to drive higher end architectural or floor standing speakers.

Their IP controllability makes it the perfect choice in a controlled environment, and coax and TOSLINK digital connectors on all inputs ensure clean and pure sonic performance in every room.

- Seamless integration with MMS
- Standalone 2-way driver support
- Networked Audio (eAudioCast)
- 7 Band Parametric EQ and DSP
- Scalable up to 96 Zones and 32 Sources

ADVANCED MUSIC BRIDGE

The Advanced Music Bridge (AMB) works with all eSeries MMS models to unlock the features available through Mirage OS 7.0+ featuring Apple Music and more! Simple plug & play operation adds this to a system in a snap.

WHOLE-HOME AMPLIFICATION WITH eAudioCast™

Bring digital entertainment to the most challenging-to-reach zones using our proprietary audio-over-IP technology to deliver hi-res audio over the home's network with no special equipment required.

Configure a complete, decentralized whole-home audio system that resides solely on the network. Proprietary eAudioCast technology allows network streams to be transmitted, received, and distributed across zones on each eSeries amplifier.

Integrate Mirage amplifiers seamlessly with MMS and Streamers to create a harmonious and modern audio system featuring all the most popular streaming music services and richest digital music files.

- Hi-Res Networked Audio Transport (24-bit/96kHz)
- No special hardware requirements
- Plug and Play setup
- Highly scalable

STANDALONE CONTROL

TUNEBRIDGE APP

An intuitive, feature-rich application allows users to browse and search their local music libraries and streaming services to play in any zone. Independent and group volume controls and zone grouping create the right setting in any room. Seamlessly save favorites and scenes to jump right back into your favorite music programs.

IN-WALL DECORA STYLE KEYPADS

Our decora style in-wall KP-6 keypad provides a tactile control experience for high trafficked rooms. Simple power and transport controls combined with user programmable presets bring music into a room at the push of a button.

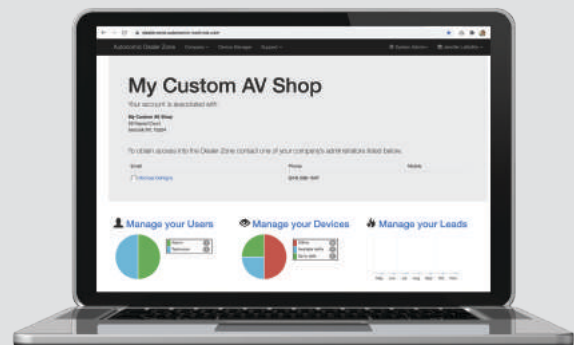

INTEGRATED CONTROLS

Add a feature-rich music experience to any control system with full, two-way feedback and controls for the Mirage Media Server and Amplifiers. Full browsing and search functionality of the popular streaming services and local music libraries deliver an immersive experience available through the control system user interface.

DEALER RESOURCES AUTONOMIC DEALER ZONE

Manage and troubleshoot deployed systems with the Autonomic Dealer Zone. Push firmware updates, make changes to the system configuration, and track service notes all from the comfort of your office.
